

- **FT Connected Business**
- Information technology provides the infrastructure backbone for companies today. The Connected Business series of podcasts examines how business leaders can use IT to improve performance and exploit new opportunities for growth.

Presented by Stephen Pritchard

- **Creating the Internet of the future** May 21, 2013
- In this week's podcast:

The Internet of Things is set to connect up everything from coffee cups to cardiac monitors, as the hardware becomes cheaper, smaller, and easier to use.

We speak to PA Consulting's Alastair McAuley, Ovum's Jeremy Green, and Concept Reply's Luigi Cicchese about how they think the technology will develop.

Presented and produced by Stephen Pritchard
