

# REGULATORY REPORTING VALIDATION TOOL 2021

## The 2021 Edition of our Regulatory Reporting Validation Tool is now available

Developed on the back of our experience of working with a regulator on their data quality framework, and our deep understanding of challenges faced by Financial Services firms, the tool enables firms to streamline and enhance their regulatory reporting internal processes.

The tool is fully customisable and provides preventative diagnostics, trend analysis and MI to validate firms' regulatory returns (e.g. COREP, FINREP). It also has extensive EBA validation capabilities to give an added layer of assurance to your senior managers.

**Python-enabled,**  
fully customisable  
to your firm's  
specific data  
environment and  
controls

**System-agnostic,**  
works seamlessly  
with a range of  
industry standard  
solutions

**Runs  
preventative  
diagnostics** to  
minimise errors  
and eliminate  
discrepancies

**Embedded MI  
and dashboard**  
for ease of use

No coding  
capabilities  
necessary

**Cost-effective  
and ready to  
deploy**

**Vishwas Khanna**  
Partner  
vi.khanna@reply.com

**Hadrien Van der Vaeren**  
Senior Manager  
h.vandervaeren@reply.com

**Ayush Verma**  
Consultant  
ay.verma@reply.com
