

# AWS European Sovereign Cloud Strategic Screening

Evaluate your path to the AWS European Sovereign Cloud (ESC) in just 2 days

## Customer Challenges

Why Organizations Struggle with ESC Decisions

- **Unclear Regulatory Context:** Evolving requirements like GDPR, NIS2, and DORA create uncertainty on sovereignty needs.
- **Unknown Architectural Impact:** ESC partition constraints on services, IAM, and federation are difficult to assess alone.
- **Limited ESC Transition Guides:** As a new, independent AWS partition, proven migration patterns and real-world benchmarks are still emerging — making structured expert guidance essential.
- **Hidden Cost & Governance Risks:** Billing implications and operating model changes remain opaque without structured analysis.

## Customer Benefits

Make Informed Sovereignty Decisions with Confidence

- **Clarity in 2 Days:** Receive a concise Go / Conditional / No-Go recommendation with a slide deck.
- **Reduced Decision Uncertainty:** Sovereignty Benefit vs. Effort Matrix quantifies trade-offs for leadership.
- **Architecture Risk Transparency:** Identify service compatibility gaps and partition constraints before committing.
- **Regulatory Context Alignment:** Map regulatory context into concrete architectural considerations for ESC adoption.

HIGHLY  
REGULATED  
INDUSTRIES

## Reply Services Offered

Our Structured Approach to ESC Evaluation

Storm Reply delivers a fixed-scope strategic screening combining an understanding of regulatory context with deep AWS platform expertise to evaluate your ESC readiness.

- Stakeholder Interview and Architecture – **Walkthrough Workshop** Day 1 on-site session reviewing your AWS environment and drivers.
- Service Compatibility and Partition – **Screening Analysis** Assess ESC service availability against your current portfolio.
- IAM, Governance and Cost – **Impact Evaluation** Review federation, billing, and operating model impacts.
- Executive Summary and Go/No-Go – **Recommendation Deck** Day 2 consolidation delivering an 8-12 pages feasibility report.

### Success: Sovereign Energy SaaS Transformation

**Challenge:** SOPTIM, a leading energy software provider needed to modernize its platform, reduce dependencies, and meet evolving regulatory and data governance requirements.

**Solution:** Storm Reply supported the migration to AWS using the Migration Acceleration Program (MAP), building a cloud-native SaaS platform with standardized architectures and strong governance controls.

**Result:** The company achieved a scalable SaaS platform with improved data control, regulatory alignment, and the flexibility to innovate while maintaining sovereignty over critical workloads.

## Who we are!

Storm Reply is specialized in the design and implementation of innovative Cloud-based solutions and services. Through consolidated expertise in the creation and management of Infrastructure as a Service (IaaS), Software as a Service (SaaS), and Platform as a Service (PaaS) Cloud solutions, Storm Reply supports important companies in Europe and all over the world in the implementation of Cloud-based systems and applications. Storm Reply is AWS Premier Consulting Partner.

## How to Engage with Storm Reply

- Pre-Workshop Questionnaire (optional, remote)
- Strategic Screening Workshop (Day 1)
- Executive Feasibility Presentation (Day 2)
- ESC Transition Roadmap (follow-up offering)
- Road.MAP to Sovereignty Program (ongoing)
