

AWS Sovereignty Analysis

Gain sovereignty clarity for your AWS environment in just two days

Customer Challenges

Why Sovereignty Demands Attention Now

- **Limited Sovereignty Visibility:** No structured view of your AWS environment's current sovereignty posture.
- **Agility Over Compliance:** Cloud architectures built for speed, not for sovereignty and regulatory-driven requirements.
- **Unclear Regulatory Context:** Limited clarity on how frameworks like GDPR, NIS2, or sector-specific requirements may impact your workloads.
- **Limited Architectural Transparency:** Data residency, access governance, and logging lack structured visibility and evaluation.

Customer Benefits

Executive Clarity Within Two Working Days

- **Sovereignty Risk Transparency:** Receive a clear overview of sovereignty-related risks across your AWS estate, including a risk heatmap.
- **Prioritized Action Items:** Get a ranked list of improvement actions aligned to your sovereignty goals and technical requirements.
- **Sovereignty Maturity Scoring:** Benchmark your environment against AWS sovereign best practices.
- **Executive Decision Support:** Concise 8–12 pages slide deck designed for board-level communication.

Who we are!

Storm Reply is specialized in the design and implementation of innovative Cloud-based solutions and services. Through consolidated expertise in the creation and management of Infrastructure as a Service (IaaS), Software as a Service (SaaS), and Platform as a Service (PaaS) Cloud solutions, Storm Reply supports important companies in Europe and all over the world in the implementation of Cloud-based systems and applications. Storm Reply is AWS Premier Consulting Partner.

Reply Services Offered

What the AWS Sovereignty Analysis Covers

A structured, fixed-price engagement combining stakeholder interviews, architecture review, and AWS-native tooling to evaluate your sovereignty posture.

- **Regulatory Context Screening** – Identification of potentially relevant frameworks (e.g., GDPR, NIS2, DORA) and high-level mapping of customer-defined requirements to workloads
- **Data Residency & Region Review** – Assess region enforcement, cross-region configs and data residency controls.
- **IAM & Encryption Assessment** – Review access governance, privileged access controls, and KMS key management.
- **Logging & Audit Foundations** – Evaluate logging, monitoring, and traceability to improve transparency and support audit readiness.

Success: Sovereign Energy SaaS Transformation

Challenge: SOPTIM, a leading energy software provider needed to modernize its platform, reduce dependencies, and meet evolving regulatory and data governance requirements.

Solution: Storm Reply supported the migration to AWS using the Migration Acceleration Program (MAP), building a cloud-native SaaS platform with standardized architectures and strong governance controls.

Result: The company achieved a scalable SaaS platform with improved data control, regulatory alignment, and the flexibility to innovate while maintaining sovereignty over critical workloads.

How to Engage with Storm Reply

- Pre-Workshop Questionnaire (optional, remote)
- Sovereignty Analysis Workshop (Day 1)
- Executive Findings Presentation (Day 2)
- Comprehensive Sovereignty Assessment (follow-up offering)
- Road.MAP to Sovereignty
