# \_Reply Living Network

The Internet has become a real "informatics system" capable of moving and allowing enormous amounts of data, information and ever more complex contents to be utilised, bringing about a new generation of products and services. A revolution that has triggered different competitive levers and has generated new organizational and behavioural models.

We are all now experiencing a "living network", a new form of ecosystem in which the barriers between digital components and real components overlap, a system in which technology enables innovation (products, processes) and innovation facilitates innovation (relations, models and products).

We are rapidly moving towards a future in which technology will preside in all moments of our lives, a visible or invisible driver of things, objects and customs.

Reply supports its customers in this path of innovation with solutions and services aimed at leveraging the opportunities provided by the Internet and emerging communication technologies.

#### The business model

Reply operates with a network of companies respectively specialised in Processes, Applications and Technologies that are centres of excellence capable of winning "Best in Class" positions in their own areas of competence.

**Processes** –Reply considers the knowledge and usage of technology as a new enabling factor to processes resulting from an in-depth expertise of the market and the industry- specific contexts.

**Applications** – Reply designs and deploys application solutions aimed at satisfying the core business requirements of companies.

**Technologies** –Reply optimises the use of state-of-the-art technologies to develop solutions that can guarantee customers maximum efficiency and operating flexibility.

Reply services include:

**Consultancy** – strategic, communication, process and technology consultancy.

**System Integration** – full exploitation of the technology potential combining business consultancy with innovative and high value-added technological solutions;

**Application Management** – management, monitoring and on-going innovation of technological assets.

#### **MARKET FOCUS**

Reply supports main European Industrial groups operating in Telco & Media, Industry and Services, Banking and Insurance and Public Administration market segments.

#### Telco & Media

In recent years, in the Telecommunications market operators have turned from connectivity providers into value-added service providers. Network infrastructures and available applications enable a new generation of convergent services related to users (business, consumer, employee), devices (Smart phone, PDA, PC, etc.) and the pattern of use. Wireless applications and applications based on Internet standards require an increasingly sophisticated approach, both in design and in development. The volume of the information managed and transmitted requires increasingly complex infrastructures, such as storage area networks.

Today Reply is a renowned actor in the process of convergence between Telco and Media, with a special focus on components regarding VAS, the digital terrestrial technology, multimedia content and asset management and Billing and CRM services.

Technology evolution and market requirements boost innovation towards a consumer market-oriented approach. Clients no longer want to see their digital world confined to a computer screen but would like to be able to have access to its services and contents at any time, independent of the device utilised.

By means of an integrated consulting, communication and creativity supply, Reply devises contents and enables innovative services harnessing all the potential of new digital channels.

Furthermore, Reply is one of the main partners with Telco Operators regarding Device Testing & Certification and internally Reply has work groups who take advantage on skills developed through many years of work on critical aspects of telecommunications scenario.

#### Banking, Insurance and Financial companies

Reply cooperates with major Banking Institutions and Insurance Companies in the identification and implementation of solutions combining core process optimization with a substantial improvement in information asset efficiency.

In particular, Reply helps its customers anticipate change by defining strategies based on new technologies (Web Services, SOA, Mobile and Wireless solutions, multi-channel portals, on-line self services, Business Intelligence and Knowledge Management) aimed at introducing actual innovation in mission-critical industries such as Trading, Asset Management, distribution channels, risk and security management.

It should also be stressed that Reply's activity in consulting and support to change are increasingly recognized by important Banking Institutions as a result of Reply's successful highly critical projects in asset management and cost optimization.

#### **Industry and Services**

Successful enterprises must be able to make quick decisions and act effectively, aligning strategies, people, processes and technologies quickly and simultaneously within "networked" structures: complex aggregations of customers, partners and providers.

Information systems ensure maximum flexibility of processes and increasingly accurate checking. New technologies strengthen and extend their potential: electronic tagging, web services, mobile solutions and instant messaging have changed the pace of evolution of companies.

Technological innovation and the ability to effectively integrate it into application solutions make up the foundations of Reply, which supports its customers in the implementation, change and management of information systems: from strategic design to the understanding and re-definition of core processes to the building of solutions ensuring integration of the applications supporting the entire value chain of the Extended Enterprise.

#### **Energy & Utilities**

In past years this industry has tackled competition and deregulation, and has had to comply with EU regulations which require the separation between the production and selling processes, under significant pressure in terms of revenues and margins and the need to provide increasing levels of service and security. Such evolution has generated consequent dynamic investments by the operators, who have discovered new competitive drives in ICT components.

Reply has defined a set of specific supplies regarding the main industry's vertical areas – Retailer, Merchant Energy Provider and Network Operations – made up of strategic and technology consulting services which optimize processes and select and implement the technology architectures and platforms most suitable to the context.

The continuous consolidation and development of competences on business core processes has made Reply a main Italian operator and has allowed Reply to enter the international market.

#### **Public administration**

Consultancy ability and business technology represent an essential factor to achieve strategic objectives set out by the Government. In this scenario, Reply which is one of the main qualified partners, will use its knowhow and experience to accompany Central and Local Public Administration in this phase of transition towards innovation.

Reply, in particular in the Public Administration, has a distinctive specialization in providing integration solutions, interoperable and orientated at application co-operation between the local and central governments and it is able to guarantee the Public Administrations a high level of consultancy support in redesigning and optimizing administration processes.

Reply supports Public Administration in achieving new modernization objectives and improving efficiency with: innovative community solutions, multichannel infotainment services and a consolidated experience in defining integration models among heterogeneous application contents.

# \_Summary report of the first quarter 2009 and expected business developments

In the first three months of 2009, which has been characterised by difficult market conditions, Reply has achieved consolidated turnover amounting to 84,3 million euros with an increase of 9.3% compared to 2008. EBITDA stood at 10,7 million euros (12.7% over revenues), and an EBIT totalling 9,3 million euros (11% over revenues). Result before taxes amounted to 8,8 million euros (10.5% over revenues).

In the corresponding period of 2008 Reply achieved consolidated turnover amounting to 77,1 million euros an EBITDA of 10,8 million euros, EBIT totalling 9,9 million and result before taxes 9,7 million euros.

The Group's net financial position at 31 March 2009 was positive and stood at 1,8 million euros, with an up slope trend compared to 31 December 2008 when the figure was negative at 18,6 million euros.

Financial year 2009 has gotten off to a positive start for Reply; Reply's turnover has increased by approximately 10%, maintaining good profitability margins despite Syskoplan's more difficult than expected trend, achieving a turnover of 14,7 million euros at 31 March, that dropped by 1.4% compared to 2008.

With the acquisition, in the month of February, of the Motorola Research Centre, Reply has set the grounds to build and construct on, with a new offer in the Internet of objects and Machine to Machine.

Lastly, together with the Armando Testa Group, at the beginning of May Reply gave life to bitmama: a new company in the digital communication segment where the creative leadership of Armando Testa and Reply's technological expertise come together to realize outstanding solutions in terms of technology, creativity and communication on all digital channels.

These final operations strengthen Reply's distinctive market positioning and further complete the offer on new digital platforms with important industrial expansion for the Group's competitiveness.

## **NOTE 1 – Accounting principles**

The Interim Management Statements as at 31 March 2009, in relation to the first quarter of financial year 2009, pursuant to Art. 154-ter, paragraph 5 of Legislative Decree 24 February 1998, no. 58 as amended by Legislative Decree 195 of 6 November 2007.

The interim report herein has been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board ("IASB") and endorsed by the European Union. The designation "IFRS" also includes all valid International Accounting Standards ("IAS"), as well as all interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), formerly the Standing Interpretations Committee ("SIC").

The accounting policies applied in these financial statements are consistent with those adopted in preparing the annual report.

The preparation of the interim report requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities the financial statements reported herein. If in the future such estimates and assumptions, which are based on management's best judgment at the date of the interim financial statements, deviate from the actual circumstances, the original estimates and assumptions will be modified as appropriate in the period in which the circumstances change.

Moreover, these valuation procedures, in particular those of a more complex nature regarding matters such as any impairment of non-current assets, are only carried out in full during the preparation of the annual financial statements, when all the information required is available, other than in the event that there are indications of impairment, when an immediate assessment is necessary

The values indicated in the accounting statements are expressed in thousands of euros.

The Interim Management report as at 31 March 2009 was not subject to audit by Reply's Independent auditors.
