

Introducing QuickConnect Accelerator for Healthcare

The challenges of technology interoperability within the NHS has existed for many years, but through recent necessity to manage COVID-19 crisis at pace and at scale has also increased renewed appetite to leverage technology to provide a better health service, with better outcomes for everyone in the UK.

None of this is achievable without solid modern cloud-based Integration. Solidsoft Reply's QuickConnect integration accelerator provides NHS Trusts and Integrated Care Partnerships a toolbox to join up systems at pace, with high quality and adhering to **FHIR** standards.

What is QuickConnect?

It is a custom Integration accelerator based on **Microsoft Azure** platform which offers a dependable foundation to resolve a range of integration challenges within the healthcare industry.

- ❑ It is the distillation of 20 years integration experience
- ❑ It provides a strong starting point that has already resolved typical integration problems.
- ❑ The governance model is defined but flexible enough to be adapted to address specific healthcare challenges.
- ❑ Delivers both an iPaaS solution & a Hybrid Integration platform

Why customers choose?

QuickConnect helps the NHS in the following ways.

1. To enable data flow of patient records across a disconnected technology landscape within an NHS Trust.
2. To enable extended patient pathways between traditionally separate trusts as part of new Integrated Care Partnerships.
3. To enable trusts to adopt FHIR standards as part of UK population health initiatives.

Integration Platform as a Service

Which Integration approach to take?

Off the shelf Product

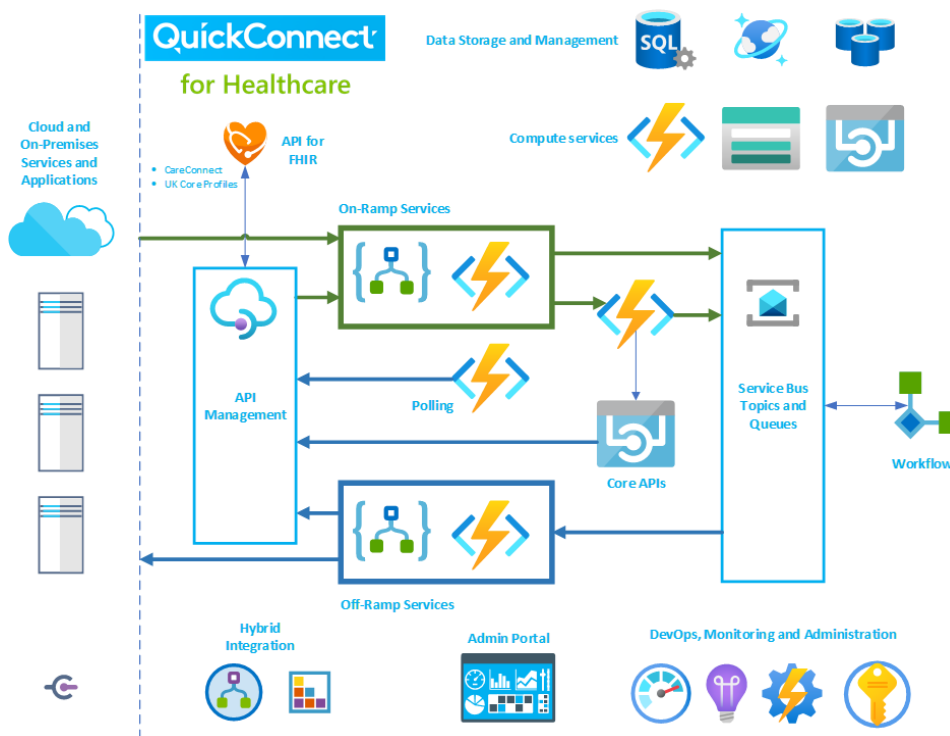

- Inflexible
- Control is seeded to the vendor
- Limited to vendor's vision
- Pay vendor consulting fee's to make minor changes
- High Cost in the long term

Accelerator

- Best of both worlds
- Defined starting point
- Flexible governance model
- Framework up & running quickly
- Lowest risk option

Bespoke Development

- Significant governance requirement
- In-house expertise demands
- High risk of non-delivery
- High Cost of Onwership

Quick Connect Accelerator

- Provides a pattern based architectural approach
- Tried and tested methodologies
- Already running live at the NHS Property Services
- In variations use at a number of Healthcare and pharmaceutical organisations
- The governance model covers data, development and Azure usage.
- Incorporates HL7 and FHIR standards
- Delivers access to the Azure superset of functions

Modern Integration with Microsoft offers limitless possibilities
